

## Greengauge expands again

2006 has been a very busy year again for Greengauge. The UK market for the surfaces division has been steady but more significant growth has been seen overseas particularly in the Far East, Australia and New Zealand.

To cope with this demand and that of the 3 sister divisions Greengauge Sports, Spa Solutions and Kaloss, the company has moved into new state of the art offices and warehousing in Haddington just outside the Scottish capital Edinburgh. The move means a ten fold increase in space from 7500sq feet to almost 80000sq feet. 2007 could be even busier!!

## Have you teed off yet?

The Greengauge Golf Tee is the new choice for all-weather golf in the UK.

## History is made

Alex Marshall Sales Manager for our sister division Greengauge Sports has become the first player in history to win the World Indoor Bowls Championships at Potters 4 times. He surpasses the 3 wins of Paul Foster and former greats Richard Corsie, Tony Allcock and David Bryant.

If that achievement was not enough he was also recently awarded the MBE for services to the sport of bowls.

Alex said "being awarded the MBE and then winning the World indoor singles for a record fourth time, well, it just doesn't get any better than this"

Well done Alex from all at the Corsie Group!

Ideal for driving ranges and out on the golf course, the Greengauge Golf Tee comprises of a unique shock absorbency pad with a realistic 40mm heavy duty artificial grass which is then in-filled with sand and rubber crumb.

The Greengauge Golf Tee is an excellent alternative to natural turf for shots played with irons or woods straight off the surface or from a tee peg. Ideal for high wear areas and certainly a way forward for par 3s which suffer from a hammering all year round.

The Greengauge golf tee is bespoke and therefore can be fitted to any area. The minimum size for a standard golf tee is 3.00m x 2.00m.

Even when there is snow on the ground the Greengauge Golf Tee is easily brushed and ready to play, providing the rest of the course is in use!

Golf professional Brian Dunbar is pictured above left taking a practice shot on the new surface at Deer Park near Livingston. "I think the grass is an excellent alternative to the usual artificial golf mats, the grass is very realistic"

To tee off give us a call now!!

## Lighting System

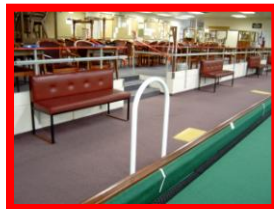

Lighting system

Greengauge is not just the UK's largest installer of indoor artificial bowling surfaces. If your club is considering the installation of a new lighting system, suspending ceiling, heating or air conditioning system then let us know.

We work with some of the UK's leading contractors in their respective markets and we can put together a comprehensive package for you. Speak to the experts and compliment your indoor surface with an up-grade in your club.

## Ancillary products from Greengauge

Handrails

Rubber ditchfill

**Very handy!!** Many indoor bowling clubs do have a fair share of elderly people who do find it hard to step onto the green from the end walkway.

Greengauge can install safety handrails at either end of the green. Relatively cheap they will provide peace of mind for those who just need that little bit of support. Give us a call now for a quote.

**Rubber ditchfill.** Rubber ditchfill liner used to be the preserve of the outdoor bowling clubs however Greengauge has seen an upsurge in sales in 2006 for indoor clubs.

Previous foam materials may be cheaper but are not as long lasting. Rubber will last for years to come. Again give us a call and we will give you prices.

## Greengauge are out to floor you

Is your indoor club still having bother with the indoor green? Are the bowls not doing what they are supposed to do? Then the problem may lie beneath the Greengauge surface and Duralay underlay – it may be the base.

More than 50% of all the UK indoor clubs now have laser levelled timber floors and they are widely recognised as providing near perfect bowling conditions.

Greengauge can offer one of the highest spec floors on the market providing a tolerance of +/- 1mm over a 3m straight edge. It can transform the way the green performs.

With well over 100 Greengauge timber floors laid not just in the UK but all over the world as far away as Australia, New Zealand, Hong Kong and Malaysia, Greengauge is one of the leaders in this market.

If your club would like a completely FOC survey done with no obligation whatsoever then please contact Germaine at our HQ. Then look forward to a perfect playing surface!
